QUARTERLY ACTIVITIES REPORT – 31 MARCH 2023 QUARTER

BARRY PARADE PROJECT

The long-term economic forecast for Brisbane and SE Queensland is generally positive with established strong population inflow and projected housing stock shortages. However, the recent cost of living increase, significant construction cost escalation in Australia and the international economic disruption impacts on production costs which has required a regular review of proposed development program.

The Barry Parade project is well placed in terms of its location and its product offering and is being positioned predominantly for the national and local market to meet the anticipated demand. Nevertheless, the cost of new production impact has meant significant product pricing adjustments will be required and this will take a period for the market to absorb.

Over the last quarter the Company has maintained its position to prudently defer the launch of its project marketing strategy from 2022 to at least late 2023 when cost of borrowing and construction costs are expected to stabilise.
